Dear Dr. Aloysius Harry,

I am contacting you with regards to your revised manuscript which is enclosed in this email.

We kindly ask you to arrange the following corrections on the enclosed version;

a. In abstract, provide value for "The results showed that liquidity had no effect on bank performance and corporate governance moderated the negative effect of liquidity on bank performance."

b. Remove the use of dotted lines in the equations e.g., (1).....
$$= \frac{\partial \ln \text{Profit}}{\partial \ln \text{Liquidity}}$$

All the corrections must be made on the attached version.

As soon as you are ready, please send me your re-Revised version via email.

Best Regards,

Melandri Elvira

Some points should be included within the manuscript in order to improve the publication.

1. The references in WSEAS must be [1], [2], [3] etc. WSEAS does not accept the system (Author, Year) for the references, but the system [1], [2], [3] etc. When citing references in the text, type the corresponding number in square brackets as shown at the end of this sentence [1].
2. The reference list should be ordered numerically according to the order of the first citation in the text.
3. The presentation of the literature could be improved. A better classification and a comparative analysis between them would be useful.
4. For readers to quickly catch the contribution in this work, it would be better to highlight major difficulties and challenges, and your original achievements to overcome them, **in a clearer way in abstract and introduction.**

Several improvements in the English Language are necessary.

1. This paper describes the results but **little discussion is included**, therefore the authors should improve notably the discussion of their results to show the scientific contribution.
2. It is mentioned in section 3.2 that *'Non-significant results are also possible because there is negative banking growth, further research can issue growth as a sample reduction criterion so that the data deviation has a smaller range.'* **More justification should be furnished on this issue.**

Reviewer: 3

1. The comment regarding "*Another method that is considered more powerful in the content analysis approach can use the sentences count or word count method so that the variability of disclosure between companies can be seen compared to only 1 if it discloses and 0 otherwise.*" **should be better explained.**
2. The section 3.2 '**Discussion**' in the present form is relatively weak and should be strengthened with **more details.**
3. The **Tables 1 and 3** must be presented better and **more details must be incorporated inside the text.**
4. The presentation of paragraph "**3. Result and Discussion**" requires **proper illustrations** for better understanding of the problem and solution.
5. It is necessary that the authors clearly **discuss how their work provides a contribution beyond alternative studies.**
6. The statistical analysis needs extension in section 3.1.
