The final manuscript should be prepared in accordance with the review and plagiarism report.

1. The essence of the manuscript should be more meaningful. Abstract is a summary of the research work. What, how and why are the main parameters of abstract. What has been discovered as a researcher? How was research discovered? Why has this research been discovered? The abstract should be of minimum 250 words and maximum of 450 words.
2. A literature review/related work is a text of a scholarly article, which includes current knowledge including anecdotal findings, as well as theoretical and methodological contributions to a particular topic. A section where researchers write in detail about remotely similar ideas and briefly mention or recall the closest ones. This section also provides a platform to take a shot at your research opponent. Literature reviews/literature surveys/related work use secondary sources, and do not report new or original experimental work. This paper may include literature surveys/traditional works/related works. Overall, literature reviews/current work may be included in this manuscript.
3. A proposed algorithm/methodology is a procedure or set of rules to be followed in computation or other problem-solving tasks. It should be written in proper way with comments which help in understanding. Overall, it may be covered step-by-step in this manuscript.
4. Proper Explanation of Figures is required.
5. The results used can be included in tabular form.
6. There are missing the use of all references. It is please noted that you have to use all references in your article whatever you have mentioned in your article. For example, if you have mentioned 25 references in your article then all 25 references should be in use.
